Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary

Application No.

10/534,942

Applicant(s)

ZAJBER ET AL.

Examiner

Kuang Y. Lin

Art Unit

1725

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 May 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 1725

1. Applicant is requested to provide in headings the specification, such as "Background of the Invention", "Summary of the Invention", "Brief Description of the Drawings", "Detailed Description of the Drawings", etc. to render the specification in better format.
2. The drawings are objected to in that in a numeral place there are several different elements represented by same reference numeral. Correction is required.
3. The specification is objected to under 35 USC 112, 1st paragraph in that the disclosure is written in a non-idiomatic expression such that render the meaning vague and indefinite. For example, in page 2, last paragraph, page 3, 2nd, 3rd, and last paragraphs, page 4, 1st, 2nd and last paragraphs, page 5, 2nd and 3rd paragraphs, page 7, 1st, 4th and 5th paragraphs, page 8, 1st, 3rd and 4th paragraphs, etc. the description is written in the such a non-idiomatic manner that it is not clear what the structure of the continuous casting mold is described.
4. Claims 1-8 are rejected under 35 USC 112, 1st paragraph for the same reasons as set forth in the objected to the specification supra.
5. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are written in a non-idiomatic manner such that render the meaning vague and indefinite. Further, these claim are written in a narrative format rather than an objective format and thereby they do not positively and directly include all the structural elements which are referred thereto. Also, in claim 1, what is "the

Art Unit: 1725

inner geometrical cross-section form and the associated measurements” “great conicity”, “greater conicity” and “casting mirror”, respectively? The expression of “the like” is deemed to be indefinite since it is not clear what it referred to. In claim 2, it is not clear what further mold structure limitation is claimed and where the antecedent in the specification for the claimed feature is. In claim 3, what further structure limitation is claim? In claim 4, what cross-section is referred to? In claim 7, what further structure limitation is claimed and what is “edge of the mold cross-section”? In claim 8, what mold structure is claim and what is “casting mirror”?

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1725

8. Claims 1-3 and 8 insofar as definite are rejected under 35 U.S.C. 103(a) as being unpatentable over either US 6,340,048 to Tsune et al., US 5,360,053 to Kawa et al., or US 4,207,941 to Shrum and further in view of US 5,467,809 to Arvedi et al.

Each of the primary references substantially shows the invention as claimed except that they do not show to reduce the mold wall volume by means of notches. However, Arvedi et al. show to provide notches on the exterior of the mold wall such that to provide more coolant contacting surface and thereby to speed up the heat removal process. It would have been obvious to provide the notches of Arvedi et al. in the mold wall of the primary references in view of the advantage. Applicant is advised that the language of "locally deducible quantity of the solidification heat for the continuous casting", "progress of the temperature diagram across the mold height", "the dissipated heat quantity per time unit", etc. do not further provide any structural limitation for the continuous casting mold as claimed.

9. Claims 4-7 insofar as definite are rejected under 35 U.S.C. 103(a) as being unpatentable over either US 6,340,048 to Tsune et al., US 5,360,053 to Kawa et al., or US 4,207,941 to Shrum in view of US 5,467,809 to Arvedi et al. as applied to claim 1 above, and further in view of US 5,343,931 to Striuli et al.

Striuli et al. show a continuous casting mold containing a substantially central, approximately parabola-shaped recess for reducing of the concentration of tensions in the strand skin and lessening of tendency to tearing of strand skin during strand withdrawal process. It would have been obvious to further provide

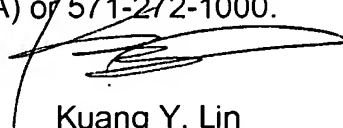

Art Unit: 1725

the continuous casting mold of the primary references with the central, approximately parabola-shaped recess of Striuli et al. in view of the advantage.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kuang Y. Lin whose telephone number is 571-272-1179. The examiner can normally be reached on Monday-Friday, 10:00-6:30,.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
